How it’s Started

Ensurigo, a global insurance company of around 2000+ employees headquartered in the United States, collaborates with external contractors to outsource tasks from their internal team. However, their current task tracking is done on an excel sheet and they now want a dedicated app to keep track of these tasks and their status.

Problem

Ensurigo is looking to design a Partner **Task Tracker App** used to track the tasks on which it collaborates with other contractors, a.k.a,partner companies

Solution

I designed Ensurigo Task Tracker App.
which is being use to track and assign tasks
